Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-14 allowed because the prior art of record does not teach or suggest an on-chip resistance and capacitance measurement structure having a combination of elements and the structure as recited in the claims including, among other things as recited in claim 1, the followings features:

- a first signal generator for driving the two circuits simultaneously through their input terminals;

- a second signal generator for driving the two circuits through their two control terminals; and

- a third signal generator for driving a second interconnect of the plurality of interconnects; wherein the capacitance of the first interconnect is determined by measuring a current difference between the two circuits and the resistance of the second interconnect is determined by measuring a voltage drop between two positions having a known distance on the second interconnect when the third signal generator feeds a known current into the second interconnect.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Dinh whose telephone number is 571-272-1890. The examiner can normally be reached on Monday to Friday from 8:30am to 5:00pm.
